

GEORGI KRASTEV

Senior Full-Stack Engineer | Technical Architect | Platform Modernization Specialist

Sofia, Bulgaria | +359 87 960 6986 | krustevgeorgi@yahoo.com | [Interactive Portfolio](#)

PROFESSIONAL SUMMARY

Hands-on technical architect with 9+ years architecting and shipping scalable, high-impact platforms across **real-time systems** (satellites), **industrial automation** (robots), **fintech** (payments), and **AI-driven automation**.

Proven expertise in **legacy platform modernization**, **design system leadership**, **third-party integrations at scale**, and **rapid MVP delivery** (3–4x faster than industry standard). combining deep technical execution (React, Node, AWS) with architectural leadership.

TECHNICAL SKILLS

Frontend Architecture

- **React:** Advanced patterns (Hooks, Context), Redux (scalable state), WebSockets (real-time).
- **Vue 3:** Composition API, Vite (build optimization), Pinia.
- **UI Systems:** Tailwind CSS, Material UI, Storybook (component documentation).
- **Languages:** TypeScript (strict typing), JavaScript (ES6+).

Backend & Cloud

- **Node.js:** Express.js, high-concurrency API design.
- **Database:** PostgreSQL (Supabase), MongoDB, SQL complex queries.
- **AWS:** S3, CloudFront, EC2, Cognito, Lambda, RDS.
- **DevOps:** Docker, GitHub Actions (Multi-env CI/CD pipelines).

Integrations & AI

- **Protocols:** REST APIs, SOAP/XML (Legacy Banking APIs), OAuth 2.0.
 - **Automation:** n8n (50+ step workflows), Custom JS Nodes, OpenAI API.
 - **Architecture:** RBAC, Microservices, Event-Driven Architecture.
-

PROFESSIONAL EXPERIENCE

PRINCIPAL FULL-STACK ENGINEER / SOLUTION ARCHITECT

Boutique Tech Consultancy (MVP Forge / ZenGroup) | Sofia, Bulgaria | *Jan 2024 – Present*

Leading technical delivery of AI automation services and rapid SaaS development, focusing on complex integrations and velocity.

Prezaredi.bg – Fuel Payments Platform (*Feb 2024 – Present*)

- **Architecture:** Architected a cross-platform solution (React Native + Node.js/AWS) enabling digital fleet payments for **20 corporate clients** (~400 cards).
- **Fintech Integration:** Implemented **BORICA SOAP API** for card issuance, PIN delivery, and settlements. Built resilient XML parsing and error recovery layers.
- **Reconciliation Engine:** Solved critical financial data mismatches (e.g., invoice rounding differences) by building an idempotent reconciliation engine with tolerance thresholds.
- **AI Automation:** Deployed an IVR system with **AI-generated voice** for immediate lost/stolen card blocking, ensuring 24/7 security without human agents.
- **Impact:** Achieved **99%+ uptime** and reduced card issuance time from 7 days to instant activation.

Automated Quarterly Reporting Agent (*Ongoing*)

- **System Design:** Built a **50-step n8n workflow** with custom JavaScript nodes to ingest survey data, perform statistical trend analysis, and generate dynamic PDFs via AWS Lambda.
- **Impact:** **Saves 60–80 hours/month** (2 FTEs) by fully automating complex data aggregation and reporting.

TabiSurvey – SaaS MVP (*Ongoing*)

- **Rapid Delivery:** Built a complex survey builder (RBAC, drag-and-drop, advanced analytics) using Vue 3, Vite, and Supabase.
- **Impact:** Shipped production-ready MVP in **3 weeks** (approx. 4x faster than industry standard).

TECHNICAL LEAD & PLATFORM ARCHITECT

EnduroSat | Sofia, Bulgaria | *Dec 2022 – Dec 2025*

Led the complete architectural overhaul of the core Satellite Operations Platform, managing cross-functional teams and technical roadmap.

Satellite Operations Platform V2 (Rewrite)

- **Modernization:** Rebuilt a fragile legacy application into a high-performance **React + Redux** platform.
- **Real-Time Features:** Implemented **WebSockets** for sub-500ms telemetry updates, live ground-track visualization (3D globe), and instant command execution.
- **Performance:** Reduced initial load time from **8s to 2s** and stabilized platform uptime to 99.9% for mission-critical ops.

Design System & Standardization

- **Strategy:** Created a centralized **Storybook component library** to unify UI across 5 internal products (Mission Control, Dashboards, etc.).
- **Impact:** Reduced codebase size by **25%** by eliminating duplication, significantly lowering bug rates and accelerating new developer onboarding.

Customer Success Portal (MyEnduroSat)

- **Launch:** Delivered a self-service portal for satellite health monitoring and billing.
 - **Impact:** Reduced support ticket volume by **20%** by empowering customers with real-time data access.
-

SENIOR FRONTEND ENGINEER

DevCloud BG | Plovdiv, Bulgaria | 2019 – 2022

Built mission-critical control software for industrial silicon-wafer processing robots.

Robot Control Center (RCC)

- **Control System:** Developed a low-latency **React + TypeScript** application communicating via binary WebSockets for precise robot manipulation.
 - **No-Code Interface:** Designed a "block puzzle" visual editor, allowing non-technical operators to program complex robot sequences without writing code.
 - **Impact:** Reduced operator training time from **4 weeks to 2 weeks** and cut manual operator errors by **90%**.
 - **Deployment:** Personally deployed and stress-tested the system on-site in **China**, ensuring reliability in a live manufacturing environment.
-

SOFTWARE ENGINEER

Aucoda | Manchester, UK | 2017 – 2019

AU Programming Language Platform

- **Cross-Platform Auth:** Engineered a unified **OAuth 2.0** implementation for a proprietary language that compiles to iOS, Android, and Web.
 - **Interop:** Built bridges between JavaScript and native Objective-C/Java to ensure consistent authentication flows across all generated apps.
 - **Impact:** Reduced authentication-related bugs in generated applications by ~80%.
-

EDUCATION

Bachelor of Science in Computer Science

University of Manchester | *2015 – 2017*

KEY ACHIEVEMENTS SNAPSHOT

Project	Metric	Business Impact
TabiSurvey MVP	3 Weeks	Shipped 4x faster than industry standard.
EnduroSat V2	75% Faster	Reduced load times from 8s to 2s.
Reporting Agent	80 Hours/Mo	Saved 2 full-time employees' worth of work.
Design System	25% Less Code	Reduced technical debt across 5 teams.
Prezaredi.bg	99% Uptime	Scaling payments for 20+ enterprise clients.
