

GEORGI KRASTEV

Senior Full-Stack Engineer | Technical Architect | Platform Modernization Specialist

krustevgeorgi@yahoo.com

+359 87 9606986

Sofia, Sofia City Province, Bulgaria

I'm a hands-on technical architect and senior full-stack engineer based in Sofia, Bulgaria. With over 9 years of experience, I've built everything from satellite operations platforms to fleet management systems processing thousands of transactions monthly.

I thrive at the intersection of complex technical challenges and elegant user experiences. Whether it's architecting a 50-step automation pipeline or leading a team of 15+ developers, I bring the same passion for quality and attention to detail.

Skills

React, Redux, TypeScript, Vue 3, Tailwind CSS, Storybook	Node.js, Express, MongoDB, SQL, Supabase, WebSockets	AWS (S3, EC2, Cloudfront), CI/CD, Docker
REST, SOAP/XML , OAuth 2.0, n8n Automations, Payment Gateways, Webhooks, LLM Integrations	UI/UX Wireframing, Pixel-Perfect Mockups, Figma, Design Systems	System Design, RBAC, Component Libraries, Performance Optimization
Cross-Functional Leadership, Strategic Planning, Team Building & Mentorship	Stakeholder Management, Product Lifecycle Management, Operational Efficiency	Client Relations, Problem Solving

Employment History

PRINCIPAL FULL-STACK ENGINEER at MVP Forge / ZenGroup, Sofia

Jan 2024 — Present

Leading technical architecture and development for multiple high-impact projects, from AI automation services to enterprise fleet management systems.

AI-Powered Reporting Automation

Built a 50-step n8n pipeline automating survey data collection, period-over-period analysis, and report generation with custom JS nodes

Impact: Saves 80 hours/month (equivalent to 2 FTEs)

TabiSurvey Platform

Architected and shipped an advanced survey platform with RBAC, dynamic survey builder, and comprehensive analytics

Impact: MVP delivered within weeks

Prezaredi.bg Digital Fuel Program

Led development of fuel payments & fleet card platform for corporate clients with BORICA payment integration

Impact: ~400 fleet cards, 20+ corporate clients, thousands of transactions/month

Team Leadership

Coordinated ~15 external developers, designers, and PMs. Made architectural decisions and negotiated with enterprise partners.

Impact: Successful delivery across multiple concurrent projects

TECHNICAL LEAD & PLATFORM ARCHITECT at EnduroSat, Sofia

Dec 2022 — Dec 2025

Transformed the satellite operations platform with a complete V2 rewrite, establishing component architecture standards across multiple product teams.

Platform V2 Rewrite

Completely rewrote the Satellite Operations Platform from a messy legacy codebase to a modern React/Redux architecture

Impact: Significant performance improvements

Component Library

Built a comprehensive component library from scratch with Storybook, standardizing UI across all internal products

Impact: Centralized ~20-25% of codebase into shared, tested components

Customer Success Portal

Developed MyEnduroSat customer success portal improving service management, mission tracking, and self-service capabilities for satellite operators

Impact: Reduced support tickets by ~20%

SENIOR FRONTEND ENGINEER at DevCloud BG, Plovdiv

Jan 2019 — Jan 2022

Built real-time control systems for industrial robots used in silicon wafer manufacturing, deployed and tested in production environments in China.

Robot Control Center (RCC)

Built a React web application with WebSocket real-time communication for robot control and monitoring

Impact: Deployed and tested in production in China

Visual Workflow Builder

Created a block-based visual programming interface for scheduling and orchestrating robot commands

Impact: Enabled non-developers to program robot sequences

SOFTWARE ENGINEER at Aucoda, Manchester

Jan 2017 — Jan 2019

Contributed to a revolutionary programming language platform that generates production-ready native apps for iOS, web, and Android from a single codebase.

OAuth Implementation

Implemented OAuth authentication flows for iOS and web platforms

Impact: Enabled secure third-party authentication

Syntax Processing Engine

Developed custom syntax processing and parsing for the AU programming language

Impact: Core language feature implementation

Professional Services

Developed and launched in production multiple web and mobile based apps for clients.

Impact: Helped the company finance product development.

Education

Computer Science, University of Manchester

2015 — 2017
